WORK EXPERIENCE

Senior Software Engineer
Paylocity
02/2023 - Present
Paylocity is an HCM SASS-based company that manages everything about an employee from hiring to firing.

Achievements/Tasks
- Designed and implemented the architecture for Company Onboarding in AWS for all newly signed-up companies.
- Persuaded engineers and product managers to move towards simpler more maintainable solutions by simplifying the onboarding process on both the product and tech side of our solutions.
- Rewrote every part of our stack post initial implementation to work for multiple providers instead of one, and changed our implementation speed from 2 months per provider to 1 week.

Software Engineer
Paylocity
07/2020 - 02/2023

Achievements/Tasks
- Helped to architect a Tax Solution that serves all of our clients using RabbitMQ, .NET.
- Taught a class on linQ to new associate engineers.
- Designed Paylocity's first fully automated deployment pipeline that requires no user interaction.
- Made security a focus by pulling important secrets out of our source control and into our CICD pipeline.
- Worked with external government agencies to ensure that our product met the requirements of their schemas.
- Coordinated and implemented event-driven architecture between teams.

Contact : *Chris Danna - (941) 962-6062*

Associate Software Engineer
Paylocity
05/2019 - 07/2020

Achievements/Tasks
- Helped rewrite the Paylocity mobile app (angular 5 and ionic 4).
- Wrote a big chunk of the Expense feature (largest mobile feature at the time).
- Wrote the Mobile camera feature.
- Wrote the User profile and people finder features.
- Mentored other developers and helped them deliver their features.
